"DocBuster makes Batch Printing easier by minimising the time we spend on time-consuming and repetitive jobs. By being able to set-up and leave jobs to print, we are able to free up time to complete other demanding duties and requests conducted on a daily basis in law firm Print Rooms."

Watson, Farley & Williams LLP

"I'm very impressed with the latest version - great new features, extremely easy to use and so much faster - what a difference!"

Norton Rose Fulbright LLP

DEVELOPED IN RESPONSE TO COMMERCIAL LAW FIRM REQUIREMENTS, DOCBUSTER IS THE DEFINITIVE BATCH PRINTING SOLUTION

BATCH PRINTING – automates the printing of batches of electronic documents.

VERY POWERFUL – in depth feature set including:

- Detailed page count before printing.
- Sort options including chronological ordering of emails.
- Best of breed slip sheets.
- Identifies password protected and corrupted files – apply given passwords to automatically de-encrypt files.
- De-duplication of documents.
- Supports numerous file types – including Microsoft® Outlook®, Word, Excel® and PDF.
- Hosts of formatting options.

EASY TO USE – designed for purpose with a user interface to match. If you have printed any Microsoft® Office documents manually you will be up and running using DocBuster in minutes.

INCREASES SPEED AND EFFICIENCY – faster processing turn around and less interaction reduces labour costs, freeing up time for other tasks.

ROI – an average return on investment in less than three months.

QUANTIFYING COST – comprehensive page count and file reporting prior to printing, allowing for accurate quantifying of the data and planning a strategy to control costs of a print job.

REDUCE RISK – of human error by automating repetitive tasks in a repeatable process. Detailed and clear report displaying all documents processed.

TRIED AND TESTED TECHNOLOGY – DocBuster has been in use in law firms for over 5 years and within Millnet for over 10 years.

DocBuster is an integral part of Millnet's 24x7 operation.

Millnet operates the largest independent legal document and data services outsourcing facility in central London. Developed by Millnet in response to commercial law firm requirements, DocBuster® is the definitive Batch Printing solution.

DOCBUSTER CORE FEATURES INCLUDE

Reports

Each DocBuster job produces a detailed spreadsheet report after processing listing breakdowns of page counts, documents processed and exceptions encountered.

Run an optimised report before printing to quantify the cost and time a print job may take and assist in any cost cutting adjustments needed for the job.

Sorting

Sort documents in the order you want them. Including sorting across folders, within folders, by name and date to name a few options.

DocBuster will even sort loose emails (msg and eml) in a Windows® directory by their sent on date without the need to pre-process or import into a Outlook® PST file.

Slip Sheets

DocBuster includes the most comprehensive slip sheets on the market, giving you ultimate flexibility on how you choose to configure them for each job.

Configure your text style and content choosing from document properties or custom text. Create slip sheets for folders, top level documents, attachments and date ranges or place holders for documents you don't want to print.

Apply a printer tray for each slip sheet level (device permitting) or point each slip sheet level to the same printer tray, the choice is yours.

Copy Files

Choose to copy the files to the job folder and hyperlink them to the report, allowing for the flattening of your data into an ordered list to facilitate manual tasks such as QA.

De-Duplication

Carry out on the fly de-duplication of documents during processing, removing the burden of printing the same documents multiple times, whilst still reporting where they reside within the produced report for audit purposes.

Multiple File Format Support

DocBuster will process numerous application types including PDF, Image files, Containers (zip, rar etc.), Microsoft® Word, Excel®, PowerPoint®, Project, Visio®, Publisher and of course Outlook®.

Formatting Options

DocBuster provides a multitude of application formatting options including many of the most pertinent page setup options for Microsoft® Word, Excel® and PowerPoint® amongst others.

Passwords

Identifies password protected files with the ability to supply passwords to automatically de-crypt files.

Settings

Have one or more house styles? Create your own user settings, to simplify the set up process even more.

Windows®/Outlook®

Process data from Windows® directories or Outlook® accounts including Outlook® Exchange folders.

64bit or 32bit

DocBuster® comes in two forms 64bit and 32bit. If you have Microsoft® Office 64bit take advantage by using DocBuster 64bit to further increase the processing power of DocBuster.
